*Re: Updated Materials -Site Approval Application – Medfield Meadows*

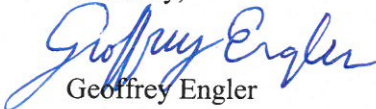

Dear Greg,

We are formally submitting updated sections of the site approval application for Medfield Meadows which was originally submitted on September 12, 2016. The development program has undergone materials changes based on feedback the Applicant has received during the Site Approval review process. The following sections have been updated and both a hard copy and electronic version has been provided:

- Updated architectural plans (density reduction, height reduction in key areas of concern, site plan modifications to decrease possible impacts to abutters, etc.).
- Updated architectural narrative
- Updated waiver list
- Updated site approval application – pages 3, 4, 9, 10, 14-19, 22 and 23

Please let us know if you have any questions about any of the updated information.

Sincerely,

Geoffrey Engler
